

Group 2 Fishmeal

Marine ingredient

Group 2 fishmeal is a high-quality marine protein produced from raw materials of wild caught fish.

High Palatability

The protein is highly palatable as well as highly digestible.

Essential amino acids

Group 2 fishmeal has good amounts of essential amino acids.

Nutritional advantages

The balanced amino acid profile in the product complements synergistic effects with other sources of proteins in the diet that can promote fast growth.

Premium Quality

This is a whole meal product from multiple drying process to retain maximum possible nutrients in the final product.

Extensively Controlled

All our factories are subjected to an extensive and strict program of approval. We carry out chemical and microbial tests through and after production.

GMO free

We only process wild caught fish to provide GMO free product to our customers.

Fully traceable

The product is fully traceable till the day and site of catching.

PRODUCT APPLICATION

Group 2 fishmeal is ideal for applications within aqua feed and animal diets.

STORAGE AND PACKING

Product can be shipped in bulk or big bags. Please see our recommendations for storage. Contact us for detailed information.

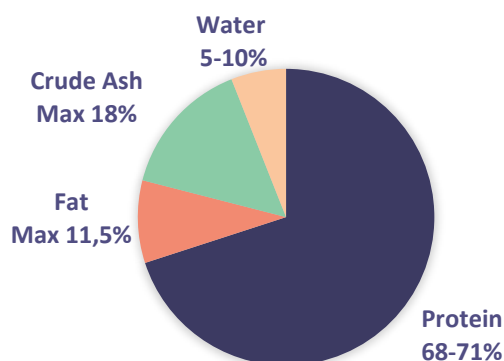

Typical nutrient composition

Amino acid Typical (% of protein)

Aspartic acid	9,0
Glutamic acid	13,6
Glycine	6,5
Histidine	2,0
Arginine	6,1
Threonine	4,4
Alanine	6,5
Proline	4,2
Tyrosine	3,2
Valine	4,8
Methionine	3,1
Isoleucine	4,3
Leucine	7,8
Phenylalanine	4,0
Lysine	8,1
Tryptophan	1,1

Microbiological

Salmonella	Negative
Enterobacteriaceae	<10 cfu/g

Others

Salt (NaCl) %	Max 4
TVN %	Max 0,2
Cadaverine (g/kg)	Max 1,8
Histamine (g/kg)	Max 0,7
Contaminants	EU limit

State of proteins

Peptides <10000 Da	60-80%
--------------------	--------

Minerals (%)

Calcium	3,3
Phosphorus	1,9
Sodium	1,2
Potassium	1,5
